

Is **YOUR** macadamia **INVESTMENT** **SECURE?**

Are you aware of the amount of unsold Australian kernel stocks overseas?

1 Before choosing your Processor, ask these questions:

How much 2005 kernel stock is unsold?

2 we have no carryover stock

What long term marketing strategies are in place to secure your NIS price?

3 we have secured fixed kernel prices for the next 4 years

What motivation do they have in sustaining a fair long term NIS price?

4 Our largest investment is in our farms. We are still investing significantly in expanding our farming base

How are they helping to reduce your farming costs?

Our state of the art infrastructure provides cost effective farm services.

Does the processor you supply measure up to the standard required for the security of your investment?
