Dear Grower

### **Kernel Recovery Reports**

We know you didn't think we could ever get through the number of samples we had to test from the deliveries this year! Our lab team have sorted, weighed, cracked, sliced and inspected their way through a very busy season. We are now delighted to provide a copy of your kernel recovery report for deliveries that you have made to Pacific Plantations throughout the 2006 season.

### **Golf Day and Forum – Friday 17 November 2006**

To celebrate the end of the 2006 harvest season, we would like to invite you to join us for a morning of golf and an informative review of the 2006 macadamia season, what it has delivered and how that will effect the seasons ahead. We hope you will leave the forum with knowledge and information that will help you. Topics include: Insect and pest monitoring, farm maintenance, how to reduce costs and details on Pacific Plantations' management services.

### **Macadamia nut orders**

This is your reminder to get those orders in. Please fax, post or drop your completed form in to the office at Friday Hut Road before **Friday, 10 November**. All orders must be collected from the Pacific Plantations office on or before **Thursday 16 November**. As our Golf day and Forum will be held on Friday 17 November, the office will be closed.

### **Macadamia Oil**

We were overwhelmed by the number of orders we received for oil this year. Thank you. We apologise that we were not able to fulfill some of the orders – we sold out of our beautiful pyramid shaped bottles after filling close to 500 bottles. Our specially shaped bottles come from Italy and although they have been on order since August, they will not arrive anytime soon. We are very happy to have found a bottle that will suit our purpose in the interim. We expect the bottles to be delivered to Pacific Plantations at the end of next week. Please send a new order to us if you missed out.

Once again, thank you for your support of Pacific Plantations,

Scott MacRae  
General Manager - Pacific Plantations
